

M107 Semi-Automatic Long Range Sniper Rifle

The M107 is an anti-materiel/counter sniper, semi-automatic, direct-line-of-sight weapon system. It fires .50 caliber ammunition precisely and rapidly out to 2000 meters. It leverages a short recoil design, variable-power day optic sight, and 10-round magazine.

The M107 weighs 35 pounds (combat ready) and includes: folding front and rear sights, fluted match grade barrel, dual-chamber detachable muzzle brake, detachable carrying handle, rubber recoil pad, rear grips, and a MIL-STD-1913 rail.

Accessories include hard and soft cases, detachable folding bipod, detachable sling, extra 10-round magazines, cleaning/maintenance equipment, and manuals.
